NEWS RELEASE

FOR IMMEDIATE RELEASE

LIQUENT BRINGS NEW REGULATORY INFORMATION MANAGEMENT SOLUTIONS TO MARKET THROUGH PARTNERSHIPS WITH THINSPRING AND ECLINSO

Philadelphia, PA, London, UK, June 23, 2008 – The Scientific business of Thomson Reuters today announced that it is expanding the breadth of the regulatory information management services it provides, following two strategic partnerships signed by Lipient.

Through collaborations with two innovative solutions providers, Lipient will expand its solution set via these strategic offerings to build on its market leader position as the key provider of software and services solutions designed specifically to meet the regulatory needs of life sciences organizations. They are:

- **ThinSpring** – Lipient will offer ThinSpring's SPL Server™ and PIM Server™ products that enable user-friendly, web-based label authoring in native XML formats.
- **ECLINSO** – Lipient and eCLINSO will offer an eCTD solution called Lipient.CONNECT™ that will be delivered via eCLINSO's hosting services. This will allow companies to produce their own eCTD without investing in expensive new IT infrastructures.

"Our customers rely on our regulatory expertise," said Rick Riegel, Vice President and General Manager at Lipient. "By collaborating with some of the most innovative companies in the marketplace, we're ensuring customers have access to the most efficient and diverse integrated solution, allowing them to manage product registrations, dossiers and documents effectively over broad time-scales."

"I am excited about our growing relationship with Lipient and the Thomson Reuters family of companies. This agreement instantly expands our sales capacity in a dynamic market requiring very specialized skills and experience," said Ron Celeste, CEO, ThinSpring. "In addition, the integration of our XML-based technology with Lipient's product dossier management tools sets the stage well for the future of electronic regulated product submissions."

"Our collaboration with Lipient will offer customers a cost-effective entry into the eCTD market, facilitate the e-submission process and create an opportunity for mid-sized and smaller pharmaceuticals to benefit from utilizing an enterprise-class eCTD solution," said Frank Pijpers, CEO of ECLINSO.

Lipient will be exhibiting at the DIA Annual Conference, June 23-25, 2008 in Boston, MA. Visit booth #438 to meet with experts and learn more about the strategic partnerships between Lipient and CSC Life Sciences, ThinSpring, and ECLINSO.

About ThinSpring

ThinSpring, founded by former pharmaceutical and medical device professionals, specializes in XML web-based solutions, integration and data conversion. ThinSpring has used its industry expertise to develop a dynamic XML engine, MatriXML™. This patented XML technology is the basis for all ThinSpring solutions including XML Sage, SPL Server, PIM Server, and eCTD Server. ThinSpring's solutions have gained acceptance as an essential, collaborative application-development platform for FDA regulated companies. ThinSpring's core team manages technology and regulatory consulting divisions that support its clients' operations throughout the United States, Europe, Asia and South America. ThinSpring headquarters is in Bridgewater, New Jersey, with offices in California. More information about ThinSpring and ThinSpring's solutions can be found on their website at:

<http://www.ThinSpring.com>.

About ECLINSO

ECLINSO is a dynamic, innovative and expanding provider of Information Technology solutions and support services. We combine IT expertise with clinical experience through managed hosting, service desk, clinical imaging, and related services to optimize business-critical processes. Our client loyalty, based on over a decade of industry experience, is the result of our competence, client focus, real partnership, and the ability to stay proactive in a changing environment. More information about ECLINSO can be found on their website at:

<http://www.eclinso.com>.
