The Future of Structured Content

Information Technology Solutions For Medical Products Built By Medical Product Professionals

ThinSpring management has decades of experience in pharmaceutical and medical products manufacturing. We provide a deep understanding of the multitude of regulatory requirements and market challenges facing your organization. Our business solutions are designed to meet the challenges of today while providing a platform for future growth.

“Excellent submission - this should be considered the Gold Standard”

~ ThinSpring Team Client, Quoting the FDA Response to Our SPL Submission for This Client

Consideration For Now & The Future

ThinSpring’s solution set provides value now and for the future of structured content management.

- Full Range of Structured Content Management Solutions including eCTD, SPL, and PIM
- FDA Solution Provider
- Corporate Leaders from Careers in Life Sciences
- World’s Leading Provider of SPL Solutions

Functions of Structured Content Management

The ThinSpring Team’s Competitive Edge

Through revolutionary technology and timely partnership, the ThinSpring Team is the only provider in the industry that can offer the full breadth of structured content solutions. The ThinSpring Team products & services include:

XML Sage™ - Our flagship product that supports your company’s full submission life cycle by providing you the capability to create, update, store and publish the complete set of product dossier documents.

eCTD Server™ - Author content and manage document groups in one completely web-based application.

SPL Server™ - The industry-leading SPL solution that gives you the power to create, edit and submit fully validated submissions every time. You choose between ThinSpring’s native structure content authoring and GrapeCity’s Microsoft Word-native authoring.

PIM Server™ - Allow your regulatory staff to collaborate real time when creating you PIM content, so that you can focus on the quality of the content without concern for format.

Online SPL Validation - Did you know that the FDA recently announced that over 25% of SPL submissions to date have been rejected due to Tier I and Tier II validation errors? When you use any of The ThinSpring Team’s solutions you can be 100% confident that you will never receive an RTF for this. Even if you choose another solution, you can still use our Online SPL Validation tool.

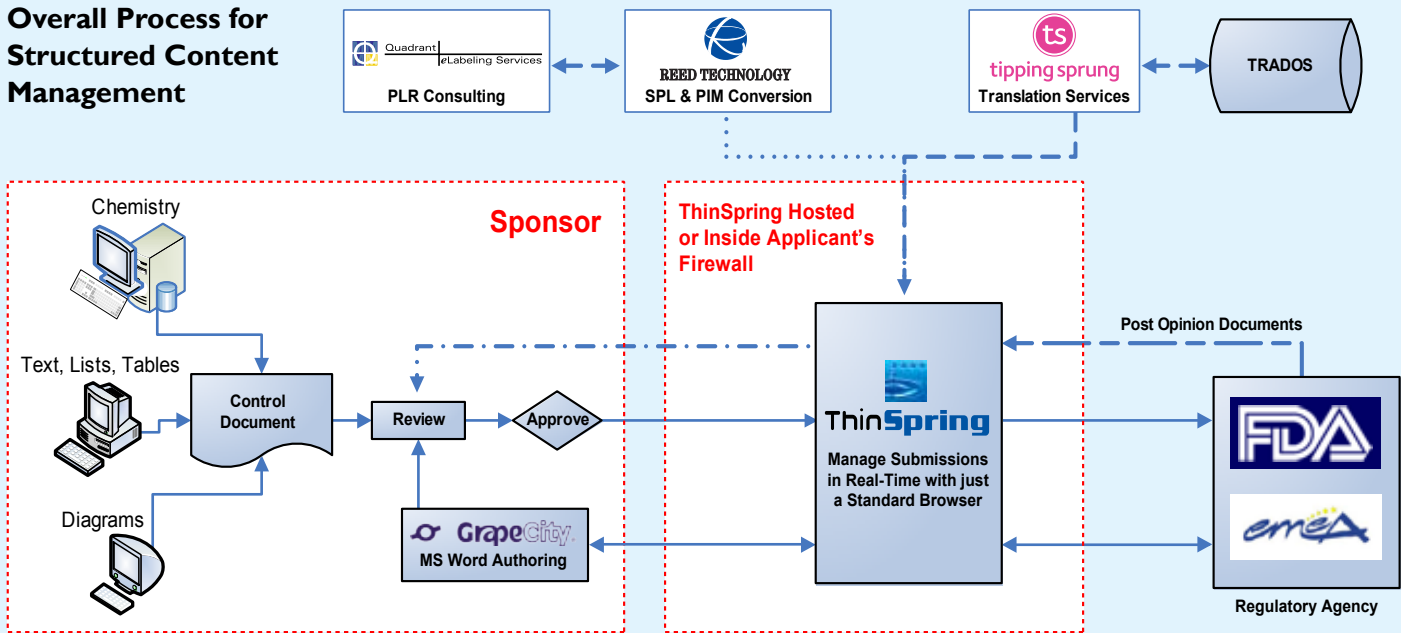

SPL & PIM Conversion - Get support for your SPL & PIM conversion needs every step of the way from initial conversion and FDA or EMEA negotiations through final delivery of SPL or PIM XML content from ThinSpring Team member Reed Technology. This includes ongoing industry alerts and updates as well as structured content education & training.

Microsoft Word-Native Authoring - No need to train employees on XML or anything else, for that matter. Use Microsoft Word to author; delete main sections, sub-sections, paragraphs, tables, ordered lists, unordered lists, and notes using the familiar Microsoft Word user interface from GrapeCity.

Overall Process for Structured Content Management

SPL-PLR Medical Terminology Consulting - Through our partnership with Reed Tech and Quadrant eLabeling we offer consulting services to assist sponsors meet the challenges of the PLR guidelines.

Human Language Translation - Our partnership with TippingSprung means you can have all of your translation needs met seamlessly across all countries, regulatory bodies, and technologies.

Why ThinSpring?

Improve Time to Market
- Risk is minimized with no refusals to file or content being flagged for additional reviewer scrutiny.

Our solutions are built from the ground up using our solid experience in providing structured content management solutions to corporations in the life sciences industry.

We know first-hand the pressures of day-to-day operations as you work to comply with regulations that

are constantly changing. We prove every day that compliance and profit are not mutually exclusive.

Flexible pricing model fits capital and expense budget constraints enabling departmental, facility and enterprise solutions.

IT Infrastructure Ready

A true thin client approach to structured content solutions reduces implementation time and IT maintenance costs.

Open standards support make ThinSpring solutions extremely cost-effective by limiting the dollars you are required to spend on hardware & software.

“I really appreciate the quick turn-around time. Just excellent!”

~ ThinSpring Client, Senior Manager, HL7 SPL Leadership Team Member

Database administration tasks are minimized as XML is dynamically mapped to and from the relational database management system repository.

Our XML infrastructure technology addresses medical product master file solutions throughout the product life cycle.

ThinSpring

Solutions For Today, Built For Tomorrow

Out tools are not just answers to today's challenges, they are solutions for the future.

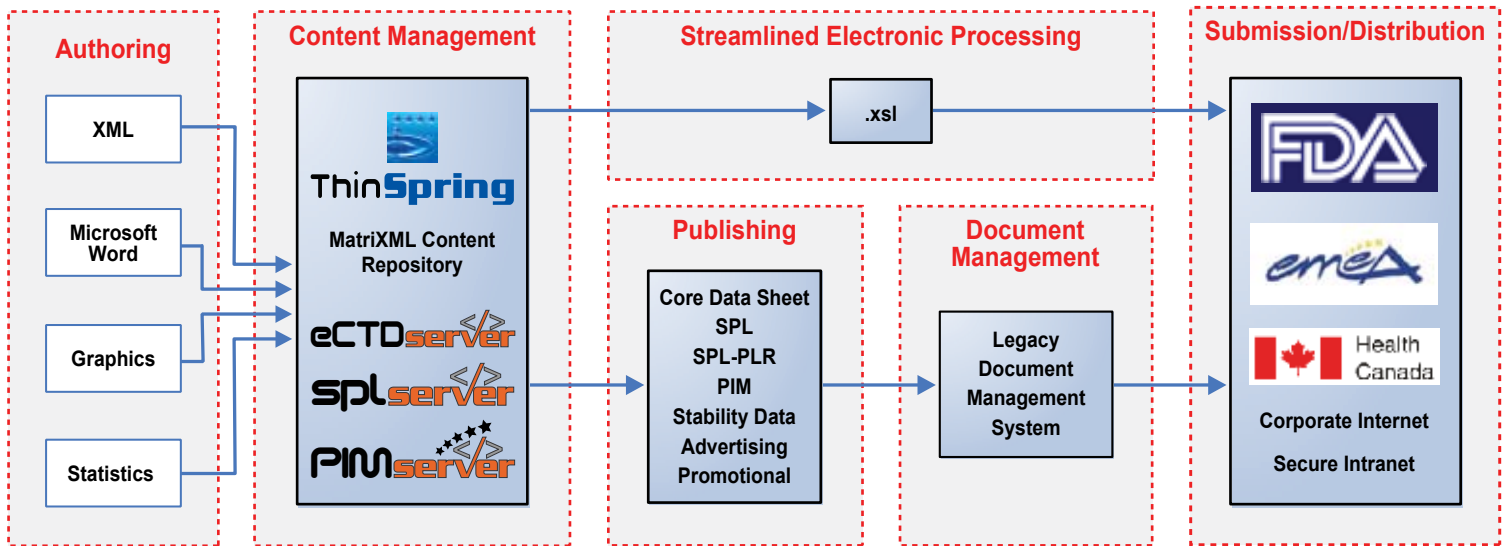

Our cutting edge technology is supported by our own subject matter experts to deliver superior solutions to you!

XML is rapidly becoming the de facto standard for electronic file interchange. ThinSpring's solutions allow native XML authoring and full medical product life cycle management now.

ThinSpring solutions meet XML web standards, electronic signature and records management compliance now. No retrofitting is required.

“Other vendors don’t have the advanced features that ThinSpring SPL Server does and have only committed to them sometime in a future release.”
~ ThinSpring Client, Labelling Associate, Regulatory Affairs
